16" Mitsubishi OEM wheels

The letter that typically sits between the rim width and diameter figures stamped on the wheel, and indicates the physical shape of the wheel where the tire bead meets it. In the cross-section on the left you can see the area highlighted in red. This one is a J profile. Most wheels shown above are J or JJ wheels.

The **center bore diameter** is **67.1 mm** for all Mitsubishi vehicles going back to 1995.

Besides **Mazda, Hyundai** and **Kia** wheels should also fit the Mitsubishi vehicles.

Jeep Patriot (2007-) and **Dodge Caliber** (2006-) have 39 mm offset (closest to the 2nd generation Outlander's 38)

1st generation (2003-2007) and 3rd generation (2013-) Outlanders have 46 mm offset.
